CAF BEHAVIOUR FRAMEWORK
Let’s work the CAF way

Our mission
We are CAF and we exist to make giving go further, so together we can transform more lives and communities around the world.

We are a charity, a bank and a champion for better giving, and for over 90 years we’ve been helping donors, companies, charities and social organisations to make a bigger impact. Our independence, expertise and reach mean we are uniquely placed to do this.

For donors, we make it easier to give, so you can give more, and more often, confident that your money gets to where it is needed.

For companies and their people, we make it possible for you to give and keep on giving, to do more for your communities.

For charities and social organisations, we provide the necessary support, so they can get more help to where it matters, more efficiently. And for society, we invest to help grow the culture of giving throughout the world.

We are CAF and we make giving count.

Introduction

The CAF Behaviour Framework sets out the performance expectations of all CAF people. Its value is that it lets us know clearly what is expected of our employees.

The Behaviour Framework has been designed around CAF’s business strategy. It sets out, in a transparent and consistent manner, the explanations of expected performance for all CAF people. It does this by providing a common language and common standards for the assessment, management and development of performance across CAF.

Behaviours are the basis of the CAF approach to the management of its people. This Framework provides a set of behaviours that will combine with the required technical skills and knowledge needed to effectively perform in any given role in CAF.

The critical feature of a CAF behaviour is that it is relevant to all CAF jobs and uses defined and observable actions to assess the potential and actual performance of the person on the job. The behaviours set the standard for all aspects of people management in CAF; from initial recruitment of new staff through to performance management, development and promotion.
Background

The behaviours in this Framework have been developed following extensive review by an independent consultant meeting with a large number of CAF people. They are not significantly different from the many existing examples in place in other organisations except that they reflect those behaviours deemed key and most likely to ensure CAF’s continued success through its people.

What are behaviours?

Behaviours describe ‘how’ as opposed to ‘what’ in relation to our performance or job responsibilities. They identify the expected standard of operating across CAF; how we do things here.

These behaviours begin the process of developing a common and objective terminology including understanding of standards expected across CAF for different levels of staff. In time we expect these behaviours will provide a common language and a greater level of understanding in our management of people.

About this booklet...

There is one set of behaviours in the Framework:

- a generic set that is applicable to all employees and differentiated by level, including definitions, contexts and examples of key behaviours (some of the behaviours only begin at more senior levels and others change focus as they move up the levels).

Technical competencies specific to each functional group will be developed over time, however, some already exist, for example within the IT and HR teams.
