This document is issued by LGT Wealth Management, the Sub Investment Manager of this Fund.

Investment objective
The aim of the Fund is to increase the value of an investment over a minimum of 5 years through a combination of capital growth - which is profit on investments held, and income received by the Fund - which is money paid out of investments, such as dividends from shares and interest from bonds. The Fund also aims to deliver, over any rolling 5 year period, an average of inflation plus 1.5% per annum.

Investment strategy
The Investment Manager seeks returns by investing in companies that are focused on driving and improving ESG change and are also well positioned to grow profit and overall company value.

Assessing ESG performance
- The Fund will seek validation of its ESG credentials using an independent ESG ratings agency to assess the portfolio’s overall ESG score.
- The Fund currently uses MSCI for this assessment and a "high" ESG score should be considered as AA or AAA. MSCI methodology can be found in the useful details section (page 3).

Responsible investing framework
Ethical screening is used to avoid investing in companies that generate more than a defined percentage of revenue from certain activities including, but not limited to:
- Tobacco, Gambling services, Armaments (military weapons, equipment and civilian firearms) – maximum of 5% of revenue.
- Pornography – maximum of 3% of revenue.
- Predatory lending, Cluster munitions and landmines – 0% of revenue.
- Coal, unconventional oil or gas extraction (eg tar sands and shale), or coal power generation - maximum of 5% of revenue.

Performance

Risk and reward profile
This indicator reflects the volatility of the fund’s share price over the last five years. See Key Investor Information Document (KIID) for details.

Securities within the portfolio are not all denominated in sterling.

The investment manager seeks to hedge currency risk for fixed income, but does not generally hedge non-sterling equity exposure.

*MSCI company ratings are provided to enable comparisons with investments held elsewhere in a standardised format. We conduct our own proprietary research which may lead us to have a view different to that expressed by the MSCI score.

*OCF as at 31/03/2024. The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) and the other expenses taken from the Fund over the last annual reporting period. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The OCF can help you compare the costs and expenses of different funds.

Past performance is not a reliable indicator of future results. The price of shares and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.
**Key Risks**

(a) The value of investments and the income from them can fall and investors may get back less than the amount invested.

(b) The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.

(c) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

(d) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

(e) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

(f) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

(g) The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

**Asset class breakdown (%)**

- Equities 36.3
- Alternatives 14.9
- Bonds 37.3
- Cash 11.6

As at 31/03/2024

Definitions: Cash and Other – may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.

Collaborative Engagement Initiatives

Case study - Nature Action 100

Nature Action 100 is a global investor engagement initiative focused on driving greater corporate ambition and action to reverse nature and biodiversity loss.

With more than half of the world’s GDP reliant on nature and its services, depleting natural capital creates significant operational, regulatory, litigation, and reputational risk for investors and businesses alike, and negative economic repercussions globally. The initiative engages companies in eight key sectors that are deemed to be systemically important in reversing nature and biodiversity loss by 2030. Launched in September of 2023, Nature Action brings together 190 investor participants representing $23.6 trillion in assets under management or advice.

Investors part of the Nature Action initiative aim to drive greater corporate ambition and action in the following sectors:

- Biotechnology and pharmaceuticals
- Chemicals
- Household and personal goods
- Consumer goods retail
- Food
- Food and Beverage
- Forestry and Paper
- Mining and Metals

LGT has joined two investor teams to push for greater ambition around nature action at companies within the pharmaceutical sector and food and beverage.

Market Commentary

- Financial markets have been behaving as if central banks have won the fight against inflation at little cost to the health of the economy. It looks possible that inflation in the US can be brought under control without a recession, although we may have to wait longer than the market initially expected before interest rate cuts begin. The UK should exit recessionary conditions in 2024.
- Expectations are still finely balanced. A scenario where immaculate disinflation prevails would likely be positive for equities. However, an economic slowdown followed by a rapid monetary policy response would be an attractive environment for high quality fixed income. Although resilient economic activity could keep rates from moving meaningfully lower, we believe fixed income holdings should play the traditional role of providing predictable income and diversification from equities.
- As inflation pressures recede, markets will turn their focus to economic growth. In a lower growth environment, companies capable of sustaining growth appear more attractive to investors. Furthermore, quality companies provide defensive characteristics in periods of market weakness.
- Experience has taught us that companies that have strong balance sheets and can create value by generating cash flow exceeding their operational requirements tend to generate stronger and more sustainable returns. They are also usually better positioned to reinvest in their businesses and distribute earnings to shareholders. We believe these types of companies merit long-term positions in portfolios regardless of shorter-term sentiment.
Important information

This report is for use by charitable clients of the IFSL CAF ESG CAUTIOUS FUND.

This Fund is an authorised Investment Company with Variable Capital. The Authorised Corporate Director is Investment Fund Services Limited (IFSL), registered office: Marlborough House, 59 Chorley New Road, Bolton, BL1 4QP. Issued by the appointed Sub Investment Manager, LGT Wealth Management. Further product information, including full details of charges and risks, is set out in the prospectus which is available from www.ifslfunds.com/sponsor-literature/CAF/
CAF Financial Solutions Limited (CFSL) is authorised and regulated by the Financial Conduct Authority under registration number 189450. CFSL registered office is 25 Kings Hill Avenue, Kings Hill, West Malling, Kent, ME19 4TA. Registered under number 2771873. CFSL is a subsidiary of Charities Aid Foundation (registered charity number 268369).
