*OCF as at 30/09/2022.*

The Ongoing Charge Figure (OCF) is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) and the other expenses taken from the Fund over the last annual reporting period. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The OCF can help you compare the costs and expenses of different funds.

**Fund description**

The aim of the Fund is to achieve capital growth which is profit on investments held, over a minimum of 5 years. Due to the nature of the investments held the Fund is also likely to provide an income, which is money paid out of investments such as dividends from shares and interest from bonds, however this is not the primary focus of the Fund.

**Investment strategy**

The Fund will be actively managed, which means the Investment Manager decides which investments to buy and when. It will invest at least 80% in other collective investment schemes, investment trusts and exchange traded funds (collectively “Investment Funds”). This could include other Investment Funds managed by the Authorised Corporate Director or the Investment Manager.

The Fund will have exposure to at least 80% in shares of companies listed on non-UK markets, including either developed or emerging markets. This may include up to 20% held directly in the shares of non-UK companies.

The value of investments may fall as well as rise. You may not get back the full amount that you originally invested. Past performance is not a guide to future performance. There is no guarantee about the level of capital or income returns that will be generated.

Key Risks

- The Fund will be exposed to stock markets and market conditions can change rapidly.
- Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- Changes in exchange rates may affect the value of your investment.
- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.
- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.
- The Fund may invest a large part of its assets in other funds for which investment decisions are made independently of the Fund. If these perform poorly, the value of your investment is likely to be adversely affected. Investment in other funds may also lead to duplication of fees and commissions.
- The Fund's investments may be subject to counterparty risk, which is the risk that a party to a transaction will fail to meet its obligations. Some or all of these obligations may arise as a result of the Fund holding investments where returns are linked to financial contracts, known as derivatives.
- The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund’s assets or to reduce the costs of investing, although this may not be achieved.
- Past performance is not a reliable indicator of future results. The price of shares and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

For full details of the fund’s objective, policy, investment and borrowing powers and details of the risks investors need to be aware of, please refer to the prospectus.

For a full description of those eligible to invest in each share class please refer to the relevant prospectus.
