

# Investment Profile 2 - CAF Cash Plus

Monthly Update

Data as at 31 March 2019

## Key Facts

### Objective

Aims to provide an enhanced level of return compared with a pure cash investment, with a higher degree of capital security and stability than a fixed income bond portfolio.

The managers invest a percentage of the portfolio in a sterling-denominated money market fund with an 'AAA' rating from Standard & Poor's. However, to achieve a return above that of cash, government and corporate bonds are also included, as well as equities, alternative assets and alternative investment strategies. All of these are subject to shorter-term fluctuations in value.

The managers will adjust the asset allocation from time to time depending upon market circumstances, but not to an extent that would significantly alter the long-term risk-return profile of the investment strategy. The portfolio combines active fund managers, who aim to outperform their benchmarks (after costs), and passive investments, which offer cost-effective market exposure. The aim is to achieve better returns than the underlying markets while controlling the overall cost of the investment.

**Suggested Time Horizon\*** 1 Year +

**Fund Launch Date** 14 Mar 2011

**Currency** GBP Sterling

### Suitability

This portfolio may be suitable for investors who want to maintain a large cash balance for periods of more than 12 months. In exchange for a return on their investment that matches inflation, investors are likely to be willing to accept a level of capital security that is slightly less than could be achieved by investing in a cash deposit account from a high street bank.

### Risk Scale

1 2 3 4 5 6 7 8 9 10

\*There is no required minimum holding period.

## CAF Risk/Return Frontier

Source: Lipper and Octopus Investments 14 March 2011 to 31 March 2019. The chart shows the annualised returns of the CAF Cash Plus Fund profile plotted against the risk and return profiles of the main asset classes used by the CAF Managed Portfolio Service. Volatility expressed investment risk in a well-diversified portfolio as the variation of annual returns above and below the long-term annual average for any single 12-month period. Please note that the target risk band is based on a three-year holding period.
