Key Facts

Objective
Aims to provide a higher investment return than could be achieved by a high-quality bond investment over the medium to long term. The managers use a balanced portfolio approach, harnessing diversified returns from bonds, equities and alternative assets. The managers will adjust the asset allocation from time to time depending upon market circumstances, but not to an extent that would significantly alter the long-term risk-return profile of the investment strategy. The portfolio combines active fund managers, who aim to outperform their benchmarks (after costs), and passive investments, which offer cost-effective market exposure. The aim is to achieve better returns than the underlying markets while controlling the overall cost of the investment.

Suggested Time Horizon* 5 Years +
Fund Launch Date 14 Mar 2011
Currency GBP

Suitability
This portfolio may be suitable for investors with a time horizon of five years or more who wish to grow their investment beyond the impact of inflation. Investors therefore accept some capital value fluctuations in the short and medium term in order to achieve an acceptable rate of return over the longer term.
