Investment Profile 3 - CAF Defensive Capital Growth

Key Facts

Objective
- Aims to provide long-term capital growth with a lower level of long-term capital risk when compared with equity-driven investments.
- The managers invest primarily in UK and international government and corporate bond funds. There is also exposure to equities, alternative assets and investment strategies and also UK equities. These may introduce fluctuations in capital value in the short to medium term.
- The managers will adjust the asset allocation from time to time depending upon market circumstances, but not to an extent that would significantly alter the long-term risk-return profile of the investment strategy. The portfolio combines active fund managers, who aim to outperform their benchmarks (after costs), and passive investments, which offer cost-effective market exposure. The aim is to achieve better returns than the underlying markets while controlling the overall cost of the investment.

Suggested Time Horizon* 3 Years +
Fund Launch Date 14 Mar 2011
Currency GBP

Risk Scale
- 1: Very Low Risk
- 2: Low Risk
- 3: Medium Risk
- 4: Medium High Risk

CAF Risk/Return Frontier

Since Launch (%)

Source: Lipper and Octopus Investments 14 March 2011 to 29 February 2020. The chart shows the annualised returns of the CAF Defensive Capital Growth Fund profile plotted against the risk and return profiles of the main asset classes used by the CAF Managed Portfolio Service. Volatility expressed investment risk in a well-diversified portfolio as the variation of annual returns above and below the long-term annual average for any single 12-month period. Please note that the target risk band is based on a three-year holding period.
